Every business starts small

Good advice can help your company put the right strategies in place to succeed and grow.

*Launching a company can be exciting, empowering and at times overwhelming – but the best part is that you're pursuing your passion. Whether you're developing strategy, managing day-to-day operations or crunching the numbers, there's no question you have a lot on your plate as a small business owner. The good news is you don't have to do it *all* on your own.*

Developing your network – from other business owners with practical experience to professionals such as lawyers, accountants and advisors – can help you put the right strategies in place to succeed and grow. You might be surprised to learn just how generous people can be with their time and knowledge.

The key for new business owners and entrepreneurs is to assemble the right informal and formal consultants. Learn as much as you can from their insights, from resources like the ones listed in this article and from in-class or online continuing education courses. Once those valuable relationships are established, don't be afraid to leverage your network whenever possible.

You need time to focus on what you do best – and you don't want to miss business opportunities because you're too busy to seize them.

Resources for business owners and entrepreneurs

Reach out to organizations that offer information, professional development and opportunities to connect with other business people in your field or your local community. They include:

- Your chamber of Commerce
- Your municipality
- Colleges and universities
- Business networks
- Industry organizations
- Professional associations

Talk to your advisor

An advisor who specializes in working with business owners can provide guidance in a number of areas of interest to business owners and entrepreneurs, including:

- Separating business and personal finances
- Generating tax-efficient income from your company

- Evaluating financing options and planning to repay debt
- Protecting you and your business from insurable risks
- Referring you to experts for specialized advice
